Center for Public Policy Innovation Hosts Policy Forum on the 'Internet of Everything'

On November 7, 2012, CPPI hosted a policy forum for key lawmakers and their staff entitled "Futurist Policy Initiative: Internet of Everything" on Capitol Hill. During the event, which was co-sponsored by Cisco, a world leader in Internet of Everything' (IoE) thought leadership, leading experts from government and the IT industry outlined the key policy and regulatory areas they believe will have the

greatest impact on helping to foster the future advancement of IoE, the next big wave of innovation worth an estimated

Netflix Is Building an Artificial Brain Using Amazon's Cloud (Wired)

February 17, 2014

Nothing beats a movie recommendation from a friend who knows your tastes. At least not yet. Netflix wants to change that, aiming to build an online recommendation engine that outperforms even your closest friends.

The online movie and TV outfit once sponsored what it called the Netflix Prize, asking the world's data scientists to build new algorithms that could better predict what movies and shows you want to see. And though this certainly advanced the state of the art, Netflix is now exploring yet another leap forward. In an effort to further hone its recommendation engine, the company is delving into "[deep learning](#)," a branch of artificial intelligence that seeks to solve particularly hard problems using computer systems that mimic the structure and behavior of the human brain. The company details these efforts in a [recent blog post](#).
