MILESTONE 3: PROJECT UPDATES

Each team will provide a 7-10 min status update on their project development progress. This is not a graded assignment but it is a mandatory milestone. All team members are responsible for the presentation and all need to be present to deliver the update.

Basic elements needed for the update are the following:

- Updated Timeline (on track, off track, etc.)
- completed so far (analysis, design, or sprints and features, etc.)
- Obstacles if any
- Will scope need to be adjusted before the final deadline? If yes, what is the new scope?
