1. RESEARCH OVERVIEW

"The research students that I have had the privilege to advise are the reason my work has been successful. I am privileged to have been able to contribute in some small way to their success. Their dedication and commitment to their study, research, and search of new knowledge is what allows science to impact the lives of so many others."

Dr. Larson is the Bobby B. Lyle Endowed Professor in Engineering Innovation and an Altshuler Distinguished Teaching Professor. He is an Associate Professor in the Department of Computer Science at SMU with courtesy appointment in the Department of Operations Research and Engineering Management. He joined SMU in August 2013 after he received his PhD from the University of Washington. He is a member of the Darwin Deason Institute for Cyber-security, Center for Global Health, SMU AT&T Center for Virtualization, and Academy of Distinguished Teachers. He is also a fellow of the Hunt Institute for Engineering Humanity. His research explores the interdisciplinary relationship of machine learning and signal/image processing with the fields of security, mobile health, education, chemistry, psycho-visual psychology, human-computer interaction, and ubiquitous computing. Like most academics, he has a passion for teaching and mentoring, and views research as an ideal opportunity to instruct the next generation of computer scientists and engineers. He has positioned himself (*with plenty of help from others*) in a unique role, supporting different research applications via the integration of machine learning and ubiquitous sensing. He has become increasingly interested in sensing markers of health and context awareness using commonplace sensors. His research supports many healthcare, educational, and security initiatives by creating applications that (1) manage and diagnose chronic/infectious ailments, (2) help learners master educational topics, and (3) investigate security and privacy through the lens of machine learning, especially side channels, information leakage, and anomaly detection.

Dr. Larson has published numerous papers at top journals and conferences, one textbook, and two book chapters, garnering over 6,000 citations (**Google Scholar H-index of 35, ranked in the top 50 of researchers at SMU and top 10 in Lyle School of Engineering**). He has established grant funding for projects as PI and Co-PI with funding from a variety of sources including **private contracts and government agencies, in excess of \$12M**. Dr. Larson has received federal grant funding from the National Science Foundation, National Institutes of Health, Department of Education, National Institutes for Standards and Technology, Department of Homeland Security, Office of Naval Research, United States Air Force, and Army Research Labs.

18. TEACHING

Teaching Awards **2023 Altshuler Distinguished Teaching Award and Member of SMU's Academy of Distinguished Teachers** which annually recognizes four SMU faculty members for their notable commitment to and achievements in fostering student learning. These are teachers whose concerns for higher education go beyond classroom boundaries and often the boundaries of their own disciplines. In student mentoring, in discussions about teaching, and in continuous reflection about their own successes and ways to improve, they represent the highest achievement in reaching the goals of higher education.

2020 Nominated for President's Associates Award which honors tenured faculty members who have sustained high achievement as teachers and whose scholarship makes a meaningful contribution to student learning

Teaching Evaluation Summary

Evaluations per course, per semester. Note that Lyle evaluation questions changed in Fall of 2019. Therefore, I am reporting evaluation scores on the question "This course helped me to develop knowledge or skills." **My overall average evaluations are higher than this question**, but I believe this question is particularly insightful towards the content, tools, and manner of my lectures.

Student Comments *"It was apparent and appreciated the amount of work you put into this course and your students. I can honestly say I am a little astounded in the amount I have learned from your course alone. Working ...and taking courses can be tough, but I always enjoyed your lectures and if I had to watch the replay, I wasn't tempted to put it on times 2."*

"...all of the notebooks that Dr. Larson provided were incredibly helpful. He provides the best resources by far in the program. He is an accomplished coder and you can tell by the way that he explains the code as he works through the problems. His videos are extremely professional..."

"Eric Larson is a fantastic and gifted teacher and does not need to change anything at all about his teaching style. He is excellent at engaging the class, is knowledgeable and passionate about the subject, and willing to help students at any time outside of class."

"One of my favorite instructors at SMU"

"Professor Larson is by far one of, if not the best professor I have ever had. He is able to teach complicated topics in an extremely approachable way."
