

ECE 8372 / CS 8352 **CRYPTOGRAPHY & DATA SECURITY**

Course Textbook
17 Jan 2020

Professor Jim Dunham
Spring 2020

The textbook for the course is *Understanding Cryptography: A Textbook for Students and Practitioners* by Christof Paar and Jan Pelz, Springer-Verlag Berlin Heidelberg 2010, ISBN 978-3-642-04100-6 e-ISBN 978-3-642-04101-3. Once you have your SMU ID and password, the textbook can be downloaded from SpringerLink as a PDF file. Instruction on how to download the textbook follow:

1. Go to the URL <http://guides.smu.edu/az.php>
2. Click on the letter “S” in the “A-Z Databases” section on the page.
3. Scroll down and select “SpringerLink.”
4. In the search block in the upper left-hand corner of the SpringerLink webpage, enter the search text “Understanding Cryptography Paar” and hit enter. The first item returned by the search will be the textbook. Make sure the “Content Type” is book in case nothing shows up.
5. Click on “Understanding Cryptography”
6. Click on “Download Book PDF” to begin downloading the textbook.
7. Save the PDF file for future usage.
8. If you are not on main campus, then you will need to login using your SMU ID (8-digit number) and password before you can download the book.
