reader preparation, see pre-requisite
reading, see code reading
recovery block, 270–272
REFINE, see measurement tool
regression testing, 88, 92, 98, 205, 211
relation, 108
reflexive, 109
symmetric, 109
transitive, 109
approaches, see SRE
assessment, 334
estimate, 375
failure rate, 375
hazard function, 378
improvement, 335, 384–385
MTBF (mean time between failure), 378
reliability function, 378
result
analysis, see quality analysis and assessment
checking, see result checking and test oracle
data, see quality measurement
result checking, 68, 91, 93, 97, 131, 144, 153, 156, 166, 178, 185, 189
review, see inspection
right software, 4, 232
risk, 325, 353
trees, 277
risk identification, 29, 36, 216, 353–369
classified data, 365–368
risk identification techniques, 353
comparison, 362–365
correlation analysis, 353–355
DA (discriminant analysis), 356–358
new, 356–362
NN (neural network), 358–359
OSR (optimal set reduction), 362
pattern matching, 362
PCA (principal component analysis), 356–358
regression model, 353
TBM, see TBM (tree-based modeling)
traditional, 355–356
run, see test
S-PLUS, see analysis tool
S-shaped model, see SRGM
S-TCAT, see test automation
safety, 23, 38, 39, 56, 269, 275–279, 297
safety assurance, 23, 45, 47, 50
accident prevention, see accident prevention
ETA, see ETA (event-tree analysis)
FTA, see FTA (fault-tree analysis)
hazard analysis, see hazard analysis
hazard resolution, see hazard resolution
safety-critical software/systems, see software, safety-critical
SAS, see analysis tool
scenario-based testing, 372
semantics, 246, 260
sensitization, 87, 110, 142, 148, 153, 156, 166, 179, 181, 182, 185, 186, 189, 195, 196, 198
silver bullet, 5
simulation, 36, 91, 213, 218
simulator, 91, 213
slice, see data slice
Smalltalk, 205
SMERFS, see analysis tool
software
auxiliary, 56, 325
aviation, 5, 121
business, 325
commercial, 4, 56, 98, 99, 116, 308, 318, 325, 334, 354, 359, 360, 386
defense, 5, 97, 116, 233
embedded, 16, 89, 207, 212, 267, 269, 270, 275, 276, 279, 281
government, 97, 116, 118, 353, 354
in heterogeneous systems, 91, 96, 207, 212, 279
menu-driven, 156–158, 167, 172
operating systems, 4, 87, 116, 167, 263
quality, see quality
safety, see safety
safety-critical, 29, 36, 38, 57, 58, 89, 141, 213, 214, 246, 263, 264, 268, 325
telecommunication, 29, 87, 207, 212, 227, 267, 325, 355, 357, 379, 386
testing, see testing
software maintenance, 211
adaptive, 211, 286
corrective, 211, 286
perfective, 211, 286
software process, 43, 59, 70
BOOTSTRAP, 233
CMM, see CMM (capability maturity model)
conformance, 231
definition, 231
improvement, 59, 94, 233, 234, 243, 248, 308, 324, 333
incremental, 32, 35, 44, 49, 60, 63, 167, 231
incremental process, 46
ISO 9000, see ISO 9000
iterative, 35, 44, 49, 60, 63, 167, 231
iterative process, 46
maintenance process, 43
maturity, 232
PSP (personal software process), 232
SPICE, 233
spiral, 35, 44, 49, 60, 63, 167, 231
spiral process, 46
waterfall, 44–45, 48, 60, 231, 232
SRE (software reliability engineering), 340, 371–387
assumptions, 373–374
concept, 371
implementation, 385–386
input domain approach, 372
models, see SRGM and IDRM
time domain approach, 372
tools, 385
SRGM (software reliability growth model), 328, 372, 377–380
application, 379–380
basic Musa model, 379
Goel-Okumoto model, 328, 334, 379
Jelinski-Moranda model, 378
Musa-Okumoto model, 379
NHPP (non-homogeneous Poisson process), 378
failure rate function, 379
mean function, 379
NHPP (non-homogeneous Poisson process) model, 378
S-shaped model, 379
state explosion, 262
state transition, see FSM
state transition probability, see Markov chain
static analysis, 246
statistical web testing, 167–171
statistics, see quality model
stochastic process, 161, 372, 378
Markov chain, see Markov chain
stationary, 165
structural testing, 35, 71, 74, 76–77, 205, 216, 291
symbolic execution, 33, 36, 246, 260, 261, 264
synchronization, 143
synchronization testing, see DFT
syntax
checking, 215
error, 248
testing, 160, 215
system testing, see testing sub-phases, 47
T3, see test automation
TBM (tree-based modeling), 328, 359–362
TBRM (tree-based reliability model), 335, 371, 372, 380–385
application, 382
construction, 381–382
reliability improvement, 384–385
test
case, 87
cases, see test preparation
failure determination, see test oracle
models, see testing techniques
oracle, see test oracle
result checking, see result checking and test oracle
run, 87, 106, 112, 114
script, 98
sensitization, see sensitization
suite, see test preparation, 88
test activities, 68–70, 73, 85–94
execution, 88, 90–92, 97–99
planning, 85–86
preparation, see test preparation
test analysis and follow-up, 93–94
test analysis and follow-up, see test activities
test automation, 85, 97–100
ATAC, 99
instrumentation, 99
McCabe Test, 99
S-TCAT, 99
T3, 98
TestWorks, 99
web-testing, see web-testing tools
test execution, see test activities, 182
test management, 85, 90, 95–97
test measurement, 90, 92–93
test oracle, 76, 91–92, 97, 100, 131, 144, 148, 153, 154, 182, 198, 214
test point
boundary point, 129
definition, 128
definition, 128
exterior point, 129
interior point, 129
OFF, 135–141
ON, 135–141
vertex point, 129
test preparation, 85–90
test cases, 86–89
systematic, see test techniques
test procedure, 89–90
test suite, 88–89
testing, 5, 7, 65
concept, 67–71
exit criteria, 78–80
informal, 69, 104
management, see test management
object, 74
people, see people
performance, 213
process, 68, 69
questions, 71–74
record-and-replay, 88
regression, see regression testing
specialized, 213
stress, 213
technique, see testing techniques
tester, see people
transaction flow, 200
usability, see usability testing, 213, 218
testing sub-phases, 35, 73, 75, 203–210
acceptance testing, 45, 47, 208, 377
beta testing, see beta testing
component testing, 206
integration testing, 206
system testing, 207, 372
unit testing, 205
testing team, 95–96
horizontal model, 96
IV&V, see IV&V
