About Net Centric Software and Systems Consortium

The consortium is a joint venture involving academic, federal and state government, and commercial institutions to collectively promote and undertake research, education, technology development, technology transfer, and technological workforce development to enable the nation to transition into the new, net-centric operation paradigm.

At present the University of North Texas, Southern Methodist University, University of Texas at Dallas and University of Texas at Arlington as well as Raytheon, Lockheed Martin Aero and several other companies are in the consortium.

More information can be found at: <http://www.netcentric.cse.unt.edu>

About NSF I/UCRC Centers

NSF Industry/University Cooperative Research Centers aim to promote cooperative research between industry and universities. The main objectives of the centers are:

- to pursue fundamental engineering and scientific research having industrial relevance
- to produce graduates who have a broad, industry-oriented perspective of their research and practice
- to accelerate and promote the transfer of knowledge and technology between university and industry

The centers are funded primarily with industrial memberships.
